

cosmetic industry pure alpha arbutin powder CAS 84380-01-8

Our Product Introduction

for more products please visit us on firskytech.com

Basic Information

- Place of Origin: China
- Brand Name: FIRSKY
- Model Number: 84380-01-8
- Minimum Order Quantity: 1KG
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 2000T

Product Specification

- Product Name: Alpha-Arbutin
- CAS NO: 84380-01-8
- Molecular Formula: C₁₂H₁₆O₇
- Molecular Weight: 272.25
- Highlight: Pure Alpha Arbutin Powder 84380-01-8, Cosmetic Industry Pure Alpha Arbutin Powder, 84380 01 8

Product Description

alpha-Arbutin CAS 84380-01-8

Description

The leaves of some plants, such as cranberry (*Vaccinium macrocarpon*) and bearberry (*Arctostaphylos uva-ursi*), contain a naturally occurring substance called alpha-arbutin. Given its potential for skin whitening and depigmentation, it is a glycoside derivative of hydroquinone.

Application

1. Alpha-arbutin is mostly utilized in the cosmetic industry for its ability to lighten skin. It functions by preventing the tyrosinase enzyme from producing melanin, the pigment responsible for skin color. By preventing tyrosinase, alpha-arbutin can lessen the synthesis of melanin, which lightens the skin and may assist with hyperpigmentation and other skin discoloration problems including age spots.

2. Hyperpigmentation and Dark Spots: Alpha-arbutin is frequently utilized in skincare items to lessen hyperpigmentation, including dark spots, melasma, or post-inflammatory hyperpigmentation brought on by acne or skin irritation. It is a well-liked component in serums, creams, and lotions that tackle these particular issues due to its skin-lightening effects.

3. Skin Brightening and Evenness: By addressing blotchiness and uneven skin tone, alpha-arbutin can aid in the promotion of a brighter and more even complexion. It can help create a more balanced appearance and an overall improvement in skin radiance.

4. Safety Profile: Hydroquinone, another often used skin-lightening chemical, is thought to be less harmful than alpha-arbutin. While skin sensitivity and irritation have been linked to hydroquinone side effects, alpha-arbutin is typically thought to be a more gentle and well-tolerated alternative.

5. Stability: Alpha-arbutin is less likely to break down in the presence of light or air than other skin-lightening agents. Because of its stability, it can continue to be beneficial over time, which makes it a popular option for skincare formulas. It's crucial to remember that everyone may respond differently to alpha-arbutin, and that effects might not show up right away.

It's also critical to utilize skincare products containing alpha-arbutin according to the directions on the packaging. For individualized advice and guidance depending on your skin type and condition, it is recommended that you speak with a dermatologist or skincare specialist if you have specific skin concerns or are thinking about using alpha-arbutin products.

Advantage

1. Firsky (Wuhan) continues to make efforts to steadily offer clients high-quality items. We have put in place a reliable internal quality management system and are always working to increase quality, decrease deviation, and eliminate waste.

2. If you have any questions, don't hesitate to ask them; we'll get back to you within 48 hours.

3. After getting the items, if you have any questions, don't hesitate to get in touch with us. We promise to compensate you in full if we were the source of the loss.

FAQ

How do I make a purchase?

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often.

1. Please let me know which products you require and how many of each you need.
2. We will provide you with the best pricing right away, including delivery charges.
3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
5. Two days after the package is sent out, a tracking number and packing photo will be provided.
6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

How are your products verified?

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

Does a discount apply to large orders?

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available.

from us.

What forms of payment do you accept?

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

Do you deliver to parcel lockers at PO boxes?

YES, we could deliver to parcel lockers at PO boxes!

Can I get a tracking number from you?

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
