

NUCIFERINE Plant Extract Weight Loss CAS 475-83-2 For Starch Blocker

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: FIRSKY
- Model Number: 475-83-2
- Minimum Order Quantity: 1KG
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 2000T

Product Specification

- Product Name: Kidney Bean Extract
- CAS NO: 475-83-2
- Highlight: **NUCIFERINE Plant Extract Weight Loss, Plant Extract Weight Loss 475-83-2**

Product Description

NUCIFERINE CAS 475-83-2

Description

Kidney bean extract, also known as Phaseolus vulgaris extract, is derived from the common kidney bean, which is a type of legume. The extract is typically obtained from the seeds of the kidney bean plant. It is commonly used as a dietary supplement and is marketed for its potential benefits in weight management and blood sugar control.

Application

1. Starch Blocker: Kidney bean extract is often promoted as a starch blocker or carbohydrate blocker. It is believed to inhibit the activity of an enzyme called alpha-amylase, which is responsible for breaking down complex carbohydrates into simple sugars. By inhibiting this enzyme, kidney bean extract may reduce the digestion and absorption of dietary starch, potentially leading to reduced calorie intake. However, the scientific evidence supporting the effectiveness of kidney bean extract as a starch blocker is limited, and the results of studies have been mixed. 2. Weight Management: Due to its potential starch-blocking properties, kidney bean extract is marketed as a weight management aid. The theory is that by reducing the digestion and absorption of carbohydrates, it may help control appetite, promote satiety, and support weight loss efforts. However, further research is needed to establish the effectiveness of kidney bean extract for weight management. 3. Blood Sugar Control: Some studies have suggested that kidney bean extract may help regulate blood sugar levels by inhibiting carbohydrate digestion. By slowing down the release of glucose from carbohydrates, it is believed to help prevent rapid spikes in blood sugar levels after meals. However, more research is needed to determine the specific effects and long-term benefits of kidney bean extract on blood sugar control. It's important to note that while kidney bean extract shows promise in some studies, further research is needed to fully understand its effects and establish its efficacy and safety. Additionally, it's crucial to consult with a healthcare professional or registered dietitian before starting any new supplement regimen, especially if you have underlying health conditions or are taking other medications. If considering the use of kidney bean extract or products containing it, it is advisable to choose reputable sources and follow the recommended dosage instructions. It is also important to maintain a balanced and healthy diet overall for optimal weight management and blood sugar control.

Advantage

1. Firsky (Wuhan) keeps working to provide customers with high-quality products steadily. We have established a sound internal quality management system and are constantly striving to improve quality, reduce deviation and waste.
2. If you have any questions, please feel free to ask questions, we will reply to your questions within 48 hours.
3. If you have any questions after receiving the goods, please feel free to contact us. If the loss is caused by us, we guarantee 100% compensation.
