**Product Description****Collagen CAS 9064-67-9****Description**

The primary structural protein in the body's connective tissues—skin, bones, tendons, ligaments, and cartilage—is collagen. It's essential for preserving joint flexibility, skin suppleness, and general tissue health.

Because of its ability to increase skin moisture, minimize wrinkles, and improve skin firmness, collagen is a highly sought-after ingredient in cosmetic formulations. Collagen production declines with ageing skin, resulting in elasticity loss and the appearance of fine lines and wrinkles. Collagen helps skincare products promote and restore the skin's natural collagen levels, giving the appearance of more youthful, vibrant skin.

Collagen also helps to improve the thickness and structure of hair and strengthens hair strands in hair care products.

**Application**

**Anti-Aging Skincare:** To fight the indications of aging, increase skin firmness, and lessen the appearance of fine lines and wrinkles, collagen is frequently used in anti-aging skincare products, such as creams, serums, and masks.

**Hair Care Formulations:** To strengthen hair, increase elasticity, and improve general health of hair, the component is added to hair care products including shampoos and conditioners.

**Joint and Bone Health:** Dietary supplements that enhance joint mobility, increase bone density, and uphold general joint health contain collagen.
