Product Description

Genistein CAS 446-72-0 natural herbal extracts

Description

Genistein is a naturally occurring isoflavone compound found in legumes like soybeans. Its potent antioxidant properties are well known.

In cosmetic compositions, genistein is used due to its potential anti-aging properties. As an antioxidant, it helps protect the skin from UV radiation, environmental stressors, and free radicals. Additionally, it exhibits activity, which may assist to reduce wrinkles and fine lines and promote skin suppleness.

In addition, studies have shown that genistein can help level out skin tones and hyperpigmentation by blocking tyrosinase from accomplishing its function.

Application

Anti-Aging Skincare: Genistein is widely used in anti-aging skincare products, such as serums and creams, to promote skin renewal, minimize the appearance of aging, and improve overall skin condition.

Skin Brightening Formulations: This chemical is found in makeup products designed to even out and highlight different skin tones, making skin appear younger and more radiant.

Sun Care Products: Genistein is added to sunscreens and after-sun care products to provide antioxidant protection and help the skin recover from sun exposure.
