Product Description

Hyaluronic Acid CAS 9004-61-9 roselle extract

Description

Hyaluronic acid is a glycosaminoglycan that occurs naturally and is found in connective tissues, skin, and eyes. It is crucial for skin hydration and lubrication due to its exceptional ability to retain moisture.

For this reason, hyaluronic acid is highly valued in cosmetic formulae as it plumps and hydrates the skin. Its remarkable ability to hold 1,000 times its own weight in water causes skin to become incredibly hydrated and promotes a youthful, dewy look.

Moreover, hyaluronic acid improves skin elasticity, reduces the visibility of fine lines and wrinkles, and soothes and calms irritated skin.

Application

Hydrating Skincare Products: Hyaluronic acid is widely used in a range of hydrating skincare products, including serums, moisturizers, and masks, to provide deep and lasting moisturization, improve skin texture, and reduce dryness and flakiness.

Formulations for Anti-Aging: This substance is used in anti-aging treatments to reduce wrinkles and fine lines, increase skin firmness, and combat signs of age.

Derma Fillers: Hyaluronic acid is a component of cosmetic injectable fillers, which are used to enhance facial features, plump up the skin, and provide the appearance of young.
