## Product Description

### **Sodium L-Ascorbyl-2-Phosphate CAS 66170-10-3 natural herbal extracts** **Description**

Salt and vitamin C (ascorbic acid) combine to form sodium L-ascorbyl-2-phosphate, a stable compound. It is widely recognized for its remarkable antioxidant and skin-brightening properties. This component is a fantastic choice for cosmetic formulations because of its stability, which efficiently provides vitamin C advantages to the skin.

Sodium L-Ascorbyl-2-Phosphate helps the skin look younger by lowering hyperpigmentation, encouraging the production of collagen, and protecting it from oxidative damage. Because of its anti-inflammatory properties, this chemical is especially helpful for soothing sensitive skin and lowering redness and irritation.
