

Cosmetic Rew Material Skin Whitening CAS 129499-78-1 Ascorbyl Glucoside Powder

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Firsky
- Model Number: FS-129499-78-1
- Minimum Order Quantity: 1KG
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 2000T

Product Specification

- Product Name: Ascorbyl Glucoside
- CAS NO: 129499-78-1
- Purity: 99%
- Shelf Life: 2 Years

Product Description

Specifications:

Product Name:	Ascorbyl glucoside
Synonyms:	Ascofresh;L-Ascorbic acid, 2-O-.alpha.-D-glucopyranosyl-;AA-2G;ascorbic acid 2-O-glucoside;ASCORBYL GLUCOSIDE, ASCORBIC ACID-2- GLUCOSIDE;2-O-A-D-GLUCOPYRANOSYL-L-ASCORBIC ACID;L-Ascorbic acid 2-o-alpha-glucoside;Pyrido(1,2-A)indol-6(7H)-one, 8,9-dihydro-7-(hydroxy(5-methyl-1H-imidazol-4-yl)methyl)-10-propyl-, (R*,S*)-
CAS:	129499-78-1
MF:	C12H18O11
MW:	338.26
EINECS:	425-980-0
Melting point	158-163
Boiling point	785.6±60.0 °C(Predicted)
density	1.83±0.1 g/cm3(Predicted)
vapor pressure	0Pa at 25
storage temp.	Keep in dark place,Sealed in dry,Room Temperature
solubility	DMSO (Slightly), Methanol (Slightly)
pka	3.38±0.10(Predicted)
form	Powder
color	White to Off-white

Description:

Ascorbic acid glucoside, CAS 129499-78-1. This powerful ingredient combines the benefits of ascorbic acid (vitamin C) and glucose to provide a wide range of benefits in your skin care formulas.

1. Enhanced product performance:

Ascorbyl Glucoside has a unique composition that works wonders for skin regeneration. It effectively brightens skin, reduces the appearance of dark spots and uneven skin tone, and improves overall skin texture. When added to your skin care formulas, this ingredient ensures your products deliver superior results, leaving customers satisfied and more likely to leave positive reviews. These positive reviews help improve your SEO ranking on Google, helping your brand gain visibility and attract more potential customers.

2. Antioxidant protection:

Ascorbyl Glucoside is a potent antioxidant that protects skin from harmful free radicals and environmental stressors. By neutralizing these damaging factors, it helps prevent premature aging such as fine lines, wrinkles and dullness. When your products contain ascorbic acid glucoside, customers will experience the long-term benefits of protected, youthful-looking skin. Positive user experience and customer satisfaction translate into higher search engine rankings, making it easier for potential customers to find your products on Google.

3. Stability and lifespan:

One of the main advantages of ascorbic acid glucoside is its excellent stability. Unlike pure ascorbic acid which oxidizes easily, ascorbic acid glucoside remains potent and potent for a longer period of time. This stability ensures your skin care products maintain their effectiveness throughout their shelf life, providing consistent results to your customers.

4. Multifunctional formula:

Ascorbyl Glucoside is versatile and compatible with a variety of skin care formulas. Whether you are producing serums, creams, lotions or masks, this ingredient blends seamlessly into your product formulations, providing maximum flexibility in product development. By adding ascorbic acid glucoside to your products, you can meet the needs and preferences of different customers.

in conclusion:

Ascorbyl Glucoside (CAS 129499-78-1) is a game changer in the skin care industry, by harnessing the power of this ingredient you can create high performance skin care products with superior results.

Application:

Ascorbic acid glucoside, CAS 129499-78-1, has a wide range of applications in various industries. Here are some of the main applications of ascorbic acid glucoside:

1. Skin care products and cosmetics:

Ascorbic acid glucoside is mainly used in skin care and cosmetics due to its excellent skin lightening and antioxidant properties. It's a common ingredient in serums, creams, lotions and masks designed to improve skin tone and reduce pigmentation for a more youthful, radiant complexion. In skin care formulations, ascorbic acid glucoside is preferred over pure ascorbic acid because of its stability, which allows for longer shelf life and better product performance.

2. Anti-aging formula:

Due to its antioxidant capabilities, ascorbic acid glucoside is widely used in anti-aging skin care formulas. It helps fight the effects of free radicals, which can cause premature aging such as wrinkles, fine lines and sagging skin. By incorporating ascorbic acid glucoside into anti-aging products, manufacturers can provide an effective solution for customers who want to maintain a youthful appearance and combat the visible signs of aging.

3. Skin Whitening and Hyperpigmentation Treatment:

Ascorbic acid glucoside is known for its skin-lightening properties, making it a valuable ingredient in products that treat hyperpigmentation, dark spots, and uneven skin tone. It inhibits the production of melanin, the pigment responsible for skin

tone, thereby helping achieve a more even, brighter skin tone. This makes ascorbic acid glucoside a popular ingredient in skin lightening creams, serums, and spot treatments.

4. Hair care products:

In addition to skin care products, ascorbic acid glucoside can also be used in hair care products. It is used in shampoos, conditioners, and conditioners to promote scalp health, strengthen hair follicles, and stimulate hair growth. Ascorbic acid glucoside's antioxidant properties also help protect hair from environmental damage and oxidative stress, keeping hair looking healthier and more vibrant.

5. Nutraceuticals and dietary supplements:

Ascorbyl glucoside is used in the production of nutraceuticals and dietary supplements due to its vitamin C content. Vitamin C is an essential nutrient with numerous health benefits, including immune support, collagen synthesis, and antioxidant protection. Ascorbic acid glucoside provides a stable form of vitamin C that can be easily incorporated into supplements and functional foods.

6. Pharmaceutical applications:

Ascorbyl glucoside is also used in the pharmaceutical industry. Its antioxidant properties make it useful in the development of drugs and formulations aimed at treating oxidative stress-related diseases. Furthermore, its stability and compatibility with various excipients make it a popular ingredient in pharmaceutical formulations.

In conclusion, ascorbic acid glucoside (CAS 129499-78-1) is a multifunctional ingredient with applications in skin care, cosmetics, hair care, nutraceuticals, and pharmaceuticals. Its skin-brightening, antioxidant and anti-aging properties make it a valuable ingredient in a variety of products designed to improve skin health, reduce pigmentation and promote overall well-being.

Advantage:

1. Firsky (Wuhan) continues to make efforts to steadily offer clients high-quality items. We have put in place a reliable internal quality management system and are always working to increase quality, decrease deviation, and eliminate waste.
2. If you have any questions, don't hesitate to ask them; we'll get back to you within 48 hours.
3. After getting the items, if you have any questions, don't hesitate to get in touch with us. We promise to compensate you in full if we were the source of the loss.

FAQ:

How do I make a purchase?

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often.

1. Please let me know which products you require and how many of each you need.
2. We will provide you with the best pricing right away, including delivery charges.
3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
5. Two days after the package is sent out, a tracking number and packing photo will be provided.
6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

How are your products verified?

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

Does a discount apply to large orders?

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.

What forms of payment do you accept?

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

Do you deliver to parcel lockers at PO boxes?

YES, we could deliver to parcel lockers at PO boxes!

Can I get a tracking number from you?

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
