

99% Purity Nucleotide Yellow Powder CAS 24292-60-2

Basic Information

- Place of Origin: China
- Brand Name: Firsky
- Model Number: FS-24292-60-2
- Minimum Order Quantity: 1KG
- Price: \$60.00 - \$90.00
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 20000T

Product Specification

- Highlight: 99% Purity Nucleotide Yellow Powder, Nucleotide CAS 24292-60-2

Description

Welcome to our company, a leading provider of high-quality chemical raw materials. We take pride in our primary product, Nucleotide, which is widely recognized in the field of chemistry. With its unique CAS number, 24292-60-2, Nucleotide plays a crucial role in various applications within the chemical industry.

Our Nucleotide stands out as a premium chemical raw material. Through meticulous production processes and stringent quality control measures, we ensure exceptional quality and stability. This vital biomolecule holds significant importance in the realms of biochemistry and pharmaceuticals.

There are several key advantages to our Nucleotide product. Firstly, it boasts exceptional purity and is free from impurities. Rigorous testing and validation procedures guarantee compliance with industry standards, making it a reliable choice for your chemical needs.

Furthermore, our Nucleotide exhibits remarkable consistency, ensuring consistent performance and reliable results in your applications. Its precise formulation and meticulous manufacturing processes contribute to its outstanding quality and effectiveness.

When it comes to product selection, our Nucleotide offers versatility and compatibility with a wide range of chemical processes. Its unique properties make it suitable for diverse applications, including pharmaceutical research, biochemical studies, and industrial manufacturing.

At our company, we prioritize customer satisfaction. Our dedicated team of experts is committed to providing exceptional service, including prompt delivery, technical support, and personalized solutions tailored to your specific requirements.

Choose our company as your trusted supplier of Nucleotide and benefit from our unwavering commitment to quality, reliability, and customer satisfaction. Contact us today to discuss how our premium Nucleotide, with its CAS number 24292-60-2, can elevate your chemical endeavors to new heights.

Application

Nucleotide, identified by its CAS number 24292-60-2, finds diverse applications in various industries. This highly versatile chemical raw material plays a crucial role in numerous processes and fields.

In the pharmaceutical industry, Nucleotide serves as a fundamental component in the development of drugs and medications. Its unique properties contribute to the synthesis of pharmaceutical compounds, enabling the creation of innovative treatments for various medical conditions. Researchers and scientists rely on Nucleotide to study and understand biological processes, aiding in the advancement of medical knowledge.

In the field of biochemistry, Nucleotide serves as a vital building block for DNA and RNA molecules. Its presence is essential for the replication, transcription, and translation processes that occur within living organisms. By studying Nucleotide and its interactions, scientists gain insights into genetic coding, gene expression, and the mechanisms of life itself.

Industrial applications also benefit from the usage of Nucleotide. Its inclusion in various manufacturing processes enhances the quality and performance of products in industries such as food and beverage, cosmetics, and agricultural chemicals. Nucleotide's unique chemical properties contribute to the formulation of innovative and high-quality products.

Additionally, Nucleotide finds applications in research and development laboratories, where it serves as a valuable tool for studying cellular processes, protein synthesis, and molecular biology. Its versatility and compatibility with different experimental techniques make it a sought-after reagent in scientific investigations.

By incorporating Nucleotide, CAS number 24292-60-2, into your processes and research, you gain access to a powerful chemical resource that unlocks possibilities for innovation, discovery, and advancement across various industries.

Advantage

1. Firsky (Wuhan) continues to make efforts to steadily offer clients high-quality items. We have put in place a reliable internal quality management system and are always working to increase quality, decrease deviation, and eliminate waste.

2. If you have any questions, don't hesitate to ask them; we'll get back to you within 48 hours.

3. After getting the items, if you have any questions, don't hesitate to get in touch with us. We promise to compensate you in full if we were the source of the loss.

FAQ

How do I make a purchase?

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often

1. Please let me know which products you require and how many of each you need.
2. We will provide you with the best pricing right away, including delivery charges.
3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
5. Two days after the package is sent out, a tracking number and packing photo will be provided.
6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

How are your products verified?

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

Does a discount apply to large orders?

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.

What forms of payment do you accept?

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

Do you deliver to parcel lockers at PO boxes?

YES, we could deliver to parcel lockers at PO boxes!

Can I get a tracking number from you?

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
