

Supplements 99% GABA 4-Aminobutyric acid CAS 56-12-2

Basic Information

- Place of Origin:
- China • Brand Name: Firsky FS-56-12-2 Model Number: • Minimum Order Quantity: 1KG • Price: CN¥354.86 - CN¥709.72 • Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton. • Delivery Time: 7-15days • Payment Terms: T/T, Western Union, MoneyGram • Supply Ability: 20000T

Product Specification

Our Product Introduction

Description

"Discover the exceptional quality and versatility of our flagship product, 4-aminobutyric acid (CAS 56-12-2), a premium chemical compound at the forefront of the industry. Renowned for its purity, reliability, and wide range of applications, our 4-aminobutyric acid is the ideal choice for your chemical needs.

Our 4-aminobutyric acid, with the CAS number 56-12-2, is meticulously synthesized using cutting-edge technology and adheres to the highest quality standards. Sourced from trusted suppliers, it guarantees consistent performance, ensuring optimal results in your applications.

As a leading chemical raw material, 4-aminobutyric acid finds extensive use in various industries. It serves as a vital building block for the synthesis of pharmaceuticals, agrochemicals, and specialty chemicals. Its unique properties and diverse applications make it an indispensable ingredient for researchers, manufacturers, and innovators.

When you choose our 4-aminobutyric acid, you benefit from its exceptional purity, stability, and efficacy. Its remarkable properties enable enhanced product performance, improved yields, and increased efficiency in your formulations. With our product, you can elevate the quality and competitiveness of your end products, setting new industry standards.

At our company, customer satisfaction is our top priority. We are committed to providing exceptional products and unmatched customer service. With our deep industry knowledge and expertise, we ensure a seamless purchasing experience and prompt delivery of your 4-aminobutyric acid requirements.

Experience the difference of our top-of-the-line 4-aminobutyric acid, CAS 56-12-2. Contact us today to discuss your specific needs and discover how our product can propel your formulations to new heights of success." Remember to customize the description to fit your company's unique offerings and brand identity.

Application

4-aminobutyric acid (CAS 56-12-2) has a wide range of applications across various industries. Here are some common uses of 4-aminobutyric acid:

1. Pharmaceuticals: 4-aminobutyric acid is utilized in the pharmaceutical industry for its potential therapeutic properties. It acts as a precursor or intermediate in the synthesis of drugs targeting the central nervous system. It is specifically known for its role as a neurotransmitter and its involvement in the regulation of neuronal excitability.

2. Food and Beverage: 4-aminobutyric acid is sometimes used as a food additive due to its potential health benefits. It has been associated with promoting relaxation and reducing stress. It can be found in certain fermented food and beverages, including wine, yogurt, and kimchi.

3. Agrochemicals: 4-aminobutyric acid is used in the agricultural industry as a plant growth regulator. It can help enhance plant tolerance to various environmental stresses, such as drought, salinity, and extreme temperatures. Additionally, it has been reported to have positive effects on crop yield and quality.

4. Research and Development: 4-aminobutyric acid is a valuable tool in scientific research. It is often used in studies focusing on neurobiology, neurochemistry, and neurotransmission. Researchers utilize 4-aminobutyric acid to investigate its role in neuronal signaling and its potential therapeutic applications.

5. Industrial Applications: 4-aminobutyric acid may find applications in other industries such as biotechnology and chemical synthesis. It can be used as a starting material for the synthesis of various compounds, including polymers, resins, and specialty chemicals.

It's important to note that the specific usage and application of 4-aminobutyric acid may vary depending on factors such as industry regulations and specific formulation requirements. It is recommended to consult with experts and refer to relevant guidelines and safety data sheets when incorporating 4-aminobutyric acid into your products or research.

Advantage

1. Firsky (Wuhan) continues to make efforts to steadily offer clients high-quality items. We have put in place a reliable internal quality management system and are always working to increase quality, decrease deviation, and eliminate waste.

2. If you have any questions, don't hesitate to ask them; we'll get back to you within 48 hours.

3. After getting the items, if you have any questions, don't hesitate to get in touch with us. We promise to compensate you in full if we were the source of the loss.

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often

- 1. Please let me know which products you require and how many of each you need.
- 2. We will provide you with the best pricing right away, including delivery charges.
- 3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
- 4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
- 5. Two days after the package is sent out, a tracking number and packing photo will be provided.
- 6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and

Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

How are your products verified?

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

Does a discount apply to large orders?

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.

What forms of payment do you accept?

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

Do you deliver to parcel lockers at PO boxes?

YES, we could deliver to parcel lockers at PO boxes!

Can I get a tracking number from you?

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
