

## cas 1197-18-8 Tranexamic acid trans-4-(Aminomethyl)cyclohexane-carboxylic acid Amstat

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: Firsky
- Model Number: FS-CAS 1197-18-8
- Minimum Order Quantity: 1KG
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 2000T

#### Product Specification

- Product Name: Tranexamic Acid
- Shelf Life: 2 Years
- CAS NO: 1197-18-8
- Purity: 99%

## Product Description

### Product Description

Product Name:	Tranexamic Acid
Synonyms:	TIMTEC-BB SBB006715;TRANS-4-AMINOMETHYL-1-CYCLOHEXANECARBOXYLIC ACID;trans-4-aminomethylcyclohexane-1-carboxylate;TRANS-4-(AMINOMETHYL)CYCLOHEXANECARBOXYLIC ACID;cyclocapron;cyklokapron;dv-79;emorhalt
CAS:	1197-18-8
MF:	C8H15NO2
MW:	157.21
EINECS:	214-818-2
Melting point	>300 °C (lit.)
Boiling point	281.88°C (rough estimate)
density	1.0806 (rough estimate)
vapor pressure	1.72hPa at 25
refractive index	1.4186 (estimate)
storage temp.	2-8°C
solubility	Freely soluble in water and in glacial acetic acid, practically insoluble in acetone and in ethanol (96 per cent).
form	Crystalline Powder

### Description

Tranexamic acid is a medication that is primarily used to prevent or control excessive bleeding. Its chemical name is trans-4-(aminomethyl)cyclohexanecarboxylic acid. The CAS number you provided, 1197-18-8, corresponds to the unique identifier for tranexamic acid in the Chemical Abstracts Service registry.

Tranexamic acid works by inhibiting the breakdown of blood clots, which helps reduce bleeding. It belongs to a class of drugs known as antifibrinolytic agents. Fibrinolysis is the process by which blood clots are dissolved, and tranexamic acid helps to prevent this process from occurring excessively.

This medication is commonly used in various medical settings, including surgery, dental procedures, and in the treatment of certain bleeding disorders. It can be administered orally, intravenously, or topically, depending on the specific situation and the healthcare professional's recommendation.

### Application

Tranexamic acid has various applications in the medical field. Here are some of its primary uses:

**Hemorrhage Control:** Tranexamic acid is commonly used to prevent or control excessive bleeding, particularly in surgical procedures. It helps by inhibiting the breakdown of blood clots, which can reduce the risk of hemorrhage.

**Menstrual Bleeding:** Tranexamic acid is also used to treat heavy menstrual bleeding, a condition known as menorrhagia. By reducing the breakdown of blood clots in the uterus, it can help decrease the amount and duration of menstrual bleeding.

**Dental Procedures:** Tranexamic acid may be used in dental procedures to minimize bleeding, especially in patients with certain bleeding disorders or those undergoing oral surgeries.

**Trauma and Injury:** In cases of trauma or injury, such as accidents or postpartum hemorrhage, tranexamic acid can be administered to help control bleeding and prevent excessive blood loss.

**Bleeding Disorders:** Tranexamic acid is sometimes prescribed for individuals with specific bleeding disorders, such as hemophilia, to help manage and prevent bleeding episodes.

### FAQ

#### How do I make a purchase?

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often

1. Please let me know which products you require and how many of each you need.
2. We will provide you with the best pricing right away, including delivery charges.
3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
5. Two days after the package is sent out, a tracking number and packing photo will be provided.
6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

#### Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

**How are your products verified?**

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

**Does a discount apply to large orders?**

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.

**What forms of payment do you accept?**

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

**Do you deliver to parcel lockers at PO boxes?**

YES, we could deliver to parcel lockers at PO boxes!

**Can I get a tracking number from you?**

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
