

cas 9064-67-9 Collagen cellagen(tm) solution with dmem Alanine, N-(2-aminopropyl)glycyl-L-prolyl-

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Firsky
- Model Number: FS-CAS 9064-67-9
- Minimum Order Quantity: 1KG
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 2000T

Product Specification

- Product Name: Collagen
- Shelf Life: 2 Years
- CAS NO: 9064-67-9
- Purity: 99%

Product Description**Product Description**

Product Name:	Collagen
Synonyms:	CELLAGEN(TM) BEADS;CELLAGEN(TM) SOLUTION AC-3;CELLAGEN(TM) SOLUTION AC-5;CELLAGEN(TM) SOLUTION EMEM;CELLAGEN(TM) SOLUTION PC-3;CELLAGEN(TM) SOLUTION PC-5;CELLAGEN(TM) SOLUTION T-IV;CELLAGEN(TM) SOLUTION WITH DMEM
CAS:	9064-67-9
MF:	C ₄ H ₆ N ₂ O ₃ R ₂ .(C ₇ H ₉ N ₂ O ₂ R) _n
MW:	0
EINECS:	618-608-5
storage temp.	2-8°C
solubility	H ₂ O: 5 mg/mL, hazy, colorless and viscous
form	solution

Description

The CAS number 9064-67-9 corresponds to collagen in the Chemical Abstracts Service registry. Collagen is the main structural protein found in the extracellular matrix of various tissues in the body, including the skin, bones, tendons, and ligaments. It is responsible for providing strength, structure, and elasticity to these tissues.

Application

Here is a description of collagen and its properties:

Structural Support: Collagen forms a fibrous network that provides structural support to tissues. It is a major component of the connective tissue, contributing to the strength and integrity of the skin, bones, cartilage, and other structures. Collagen fibers add tensile strength to tissues, allowing them to withstand stretching and mechanical stress.

Skin Health: In the context of skincare, collagen is often associated with maintaining skin health and youthfulness. It plays a crucial role in the structure of the dermis, the deeper layer of the skin. Collagen fibers provide firmness, elasticity, and hydration to the skin. With age, the natural production of collagen decreases, leading to the appearance of wrinkles, sagging skin, and loss of elasticity.

Wound Healing: Collagen is involved in the wound healing process. It acts as a scaffold for new tissue formation, helping to close and repair wounds. Collagen promotes cell migration, angiogenesis (formation of new blood vessels), and the deposition of new collagen fibers, contributing to the regeneration of damaged tissues.

Types of Collagen: There are different types of collagen in the body, such as type I, type II, type III, and so on, each with specific structural and functional characteristics. Type I collagen is the most abundant and is found in the skin, tendons, bones, and other connective tissues. Type II collagen is primarily found in cartilage.

FAQ**How do I make a purchase?**

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often

1. Please let me know which products you require and how many of each you need.
2. We will provide you with the best pricing right away, including delivery charges.
3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
5. Two days after the package is sent out, a tracking number and packing photo will be provided.
6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

How are your products verified?

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

Does a discount apply to large orders?

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.

What forms of payment do you accept?

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

Do you deliver to parcel lockers at PO boxes?

YES, we could deliver to parcel lockers at PO boxes!

Can I get a tracking number from you?

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
