

99% purity Chemical Grade B-Nicotinamide Mononucleotide NMN Powder CAS 1094-61-7

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Firsky
- Model Number: FS- 1094-61-7
- Minimum Order Quantity: 1KG
- Price: \$50.00 - \$100.00
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 20000T

Product Specification

Description

Our company specializes in providing top-quality chemical raw materials, and we are proud to introduce our flagship product, B-Nicotinamide Mononucleotide (CAS 1094-61-7).

B-Nicotinamide Mononucleotide is a cutting-edge chemical compound that has gained significant attention in various industries. With its exceptional purity and superior quality, our B-Nicotinamide Mononucleotide stands out as a reliable and sought-after solution for your chemical needs.

Key Features:

1. **Purity:** Our B-Nicotinamide Mononucleotide is meticulously synthesized using advanced techniques, ensuring a purity level that meets the highest industry standards.
2. **Versatility:** B-Nicotinamide Mononucleotide finds applications in diverse chemical processes, making it an indispensable ingredient for numerous industrial sectors.
3. **Stability:** Our product is formulated to exhibit exceptional stability, allowing for long shelf life and consistent performance in various environments.
4. **Quality Control:** We adhere to strict quality control measures throughout the manufacturing process, ensuring that our B-Nicotinamide Mononucleotide consistently meets or exceeds the specifications and purity requirements.
5. **Expertise:** Backed by years of experience and a team of skilled professionals, our company is committed to delivering chemical raw materials that surpass customer expectations.

Applications:

B-Nicotinamide Mononucleotide has a wide range of applications in the chemical industry, including but not limited to:

- **Pharmaceutical Research:** B-Nicotinamide Mononucleotide serves as a crucial component in the development of novel pharmaceutical formulations, aiding in research related to various health conditions.
- **Biotechnology:** Our product finds applications in biotechnological processes, where it acts as a catalyst or precursor for the synthesis of valuable compounds.
- **Cosmetics:** B-Nicotinamide Mononucleotide is utilized in the formulation of cosmetic products, contributing to their efficacy and overall quality.
- **Nutraceuticals:** Due to its potential health benefits, B-Nicotinamide Mononucleotide is also used in the production of nutraceutical supplements, catering to the growing demand for wellness products.

For detailed technical specifications, pricing, and any further inquiries regarding B-Nicotinamide Mononucleotide (CAS 1094-61-7), please don't hesitate to contact us. Our dedicated team is ready to assist you and provide tailored solutions to meet your unique requirements.

Application

B-Nicotinamide Mononucleotide (CAS 1094-61-7) has various applications across different industries. Here are some common uses:

1. **Pharmaceutical Research:** B-Nicotinamide Mononucleotide is extensively studied for its potential health benefits and its role in cellular energy production. It is commonly used in pharmaceutical research to investigate its effects on aging, metabolism, and various health conditions.
2. **Anti-Aging Supplements:** B-Nicotinamide Mononucleotide is widely recognized for its potential anti-aging properties. It is often included in dietary supplements and nutraceutical products aimed at promoting healthy aging and improving overall well-being.
3. **Energy Metabolism:** As a precursor to nicotinamide adenine dinucleotide (NAD⁺), B-Nicotinamide Mononucleotide is involved in energy metabolism processes within the body. It supports cellular energy production and plays a crucial role in maintaining mitochondrial function.
4. **Sports Performance:** Some athletes and fitness enthusiasts use B-Nicotinamide Mononucleotide as part of their supplementation regimen to potentially enhance physical performance and optimize recovery. It is believed to aid in energy production, metabolism, and muscle function.
5. **Cosmetics and Skincare:** B-Nicotinamide Mononucleotide is also utilized in the cosmetics and skincare industry. It is known for its potential benefits in promoting skin health, improving skin texture, and reducing the appearance of fine lines and wrinkles.

It is important to note that while B-Nicotinamide Mononucleotide has shown promising results in various areas of research, it is always recommended to consult with a healthcare professional or expert before using it for any specific purpose. They can provide personalized advice and guidance based on individual needs and circumstances.

Advantage

1. Firsky (Wuhan) continues to make efforts to steadily offer clients high-quality items. We have put in place a

reliable internal quality management system and are always working to increase quality, decrease deviation, and eliminate waste.

2. If you have any questions, don't hesitate to ask them; we'll get back to you within 48 hours.

3. After getting the items, if you have any questions, don't hesitate to get in touch with us. We promise to compensate you in full if we were the source of the loss.

FAQ

How do I make a purchase?

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often

1. Please let me know which products you require and how many of each you need.
2. We will provide you with the best pricing right away, including delivery charges.
3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
5. Two days after the package is sent out, a tracking number and packing photo will be provided.
6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

How are your products verified?

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

Does a discount apply to large orders?

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.

What forms of payment do you accept?

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

Do you deliver to parcel lockers at PO boxes?

YES, we could deliver to parcel lockers at PO boxes!

Can I get a tracking number from you?

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
