Product Description

Black Bean Extract CAS 7896-97-1

Description

Black Bean Extract is derived from the seeds of *Phaseolus vulgaris*, the common black bean known for its nutritional value. This extract contains bioactive compounds, including polyphenols, anthocyanins, and flavonoids. In cosmetic formulations, Black Bean Extract is highly valued for its antioxidant properties. It helps protect the skin from oxidative stress and free radical damage, supporting a more youthful and healthy-looking complexion. Additionally, Black Bean Extract is believed to have soothing and calming effects, making it beneficial for addressing sensitive and irritated skin. Its moisturizing properties contribute to skin hydration and maintaining a smooth and supple complexion.

Application

Antioxidant Skincare: Black Bean Extract is commonly used in antioxidant-rich skincare products, including serums, creams, and lotions, to provide protection against environmental stressors and promote overall skin health. **Natural Skincare:** The extract is included in natural and botanical skincare products that prioritize the use of plant-based ingredients for skin health and well-being. **Sensitive Skin Formulations:** Black Bean Extract is found in skincare products designed to soothe and calm sensitive and irritated skin, reducing redness and discomfort.

Advantage

1. Firsky (Wuhan) keeps working to provide customers with high-quality products steadily. We have established a sound internal quality management system and are constantly striving to improve quality, reduce deviation and waste.
2. If you have any questions, please feel free to ask questions, we will reply to your questions within 48 hours.
3. If you have any questions after receiving the goods, please feel free to contact us. If the loss is caused by us, we guarantee 100% compensation.
