Product Description

1-Deoxynojirimycin CAS 19130-96-2

Description

1-Deoxynojirimycin (DNJ) is a naturally occurring compound found in certain plants, such as the white mulberry tree (*Morus alba*) and other related species. It is a type of alpha-glucosidase inhibitor, which means it can help regulate blood sugar levels. In cosmetic formulations, 1-Deoxynojirimycin is valued for its potential skin benefits. It is believed to have brightening properties, making it beneficial for addressing hyperpigmentation and promoting a more even skin tone. Additionally, 1-Deoxynojirimycin is known for its moisturizing effects, helping to improve skin hydration and maintain a smooth and supple complexion.

Application

Skin-Brightening Skincare: 1-Deoxynojirimycin is commonly used in skincare products aimed at brightening and evening out skin tone, resulting in a more radiant and youthful complexion. **Moisturizing Formulations:** The compound is included in products designed to provide intense and long-lasting hydration, supporting overall skin health and suppleness. **Natural Skincare:** 1-Deoxynojirimycin is used in natural and botanical skincare products that focus on gentle and effective solutions for skin health.
