Product Description

Tea Polyphenol CAS 84650-60-2

Description

Tea Polyphenol is a natural compound extracted from green tea leaves (*Camellia sinensis*). It is known for its potent antioxidant and anti-inflammatory properties. In cosmetic formulations, Tea Polyphenol is highly valued for its ability to protect the skin from oxidative stress and environmental damage, which are major contributors to premature aging and skin damage. It helps neutralize free radicals, reduce inflammation, and promote overall skin health. Additionally, Tea Polyphenol is known for its potential to address hyperpigmentation and promote a more even skin tone.

Application

Antioxidant Skincare: Tea Polyphenol is commonly used in antioxidant-rich skincare products, such as serums and lotions, to combat the effects of free radicals, reduce signs of aging, and support skin health. **Skin-Brightening Formulations:** The compound is included in products designed to brighten and even out skin tone, resulting in a more radiant and youthful complexion. **Sun Care Products:** Tea Polyphenol is incorporated into sunscreens and after-sun care products to provide antioxidant protection and support skin recovery from sun exposure.
