

cas 4759-48-2 Isotretinoin EINECS 225-296-0 13-cis-Retinoic acid factory supply hot selling

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Firsky
- Model Number: FS-CAS 4759-48-2
- Minimum Order Quantity: 1KG
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 2000T

Product Specification

- Product Name: Isotretinoin
- Shelf Life: 2 Years
- CAS NO: 4759-48-2
- Purity: 99%

Product Description

Product Description

Product Name:	Isotretinoin
Synonyms:	Tretinoin Impurity 1(Tretinoin EP Impurity A);Anti Acne Powerful Isotretinoin Powder Isotretinoin Pharmaceutical Raw Materials;Isotretinoin Capsules;Isotretinoin-D5/13-cis-Retinoic acid-D5;Roaccutan;(2Z,4E,6E,8E)-3,7-diMethyl-9-(2,6,6-triMethylcyclohex-1-en-1-yl)nona-2,4,6,8-tetraenoic acid;ISOTRETINON;A different diMension acid
CAS:	4759-48-2
MF:	C ₂₀ H ₂₈ O ₂
MW:	300.44
EINECS:	225-296-0
Melting point	172-175 °C (lit.)
Boiling point	381.66°C (rough estimate)
density	1.0597 (rough estimate)
refractive index	1.4800 (estimate)
storage temp.	-20°C
solubility	Practically insoluble in water, soluble in methylene chloride, slightly soluble in ethanol (96 per cent). It is sensitive to air, heat and light, especially in solution. Carry out all operations as rapidly as possible and avoid exposure to actinic light; use freshly prepared solutions.
pka	4.76±0.33(Predicted)
form	Fine Crystalline Powder
color	Yellow-orange to orange

Description

The CAS number 4759-48-2 corresponds to isotretinoin in the Chemical Abstracts Service registry. Isotretinoin is a medication that is primarily used for the treatment of severe acne that has not responded to other treatments. It is a derivative of vitamin A and belongs to a class of drugs known as retinoids.

Application

Here is a description of isotretinoin and its properties:

Acne Treatment: Isotretinoin is highly effective in treating severe, nodular acne that has not responded to other treatments. It works by reducing the size of sebaceous glands and decreasing sebum (oil) production in the skin. By reducing oil production and preventing the clogging of pores, isotretinoin helps to minimize acne breakouts and improve the overall appearance of the skin.

Sebum Regulation: Isotretinoin helps to regulate the production of sebum, which is an oily substance produced by the sebaceous glands. Excessive sebum production can contribute to the development of acne. By reducing sebum production, isotretinoin helps to control oiliness and prevent blockage of hair follicles.

Anti-inflammatory Effects: Isotretinoin has anti-inflammatory properties, which can help reduce redness, swelling, and inflammation associated with acne breakouts. It helps to calm the skin and promote a clearer complexion.

Impact on Keratinization: Isotretinoin can normalize the process of keratinization, which is the formation and shedding of skin cells. It helps to prevent the accumulation of dead skin cells within the follicles, reducing the formation of comedones (clogged pores) and promoting smoother skin texture.

Potential Side Effects: Isotretinoin is a potent medication and can have significant side effects. Some common side effects include dryness of the skin, lips, and eyes, as well as increased sensitivity to sunlight. It may also cause dryness of the nasal passages, nosebleeds, and muscle or joint pain. Isotretinoin can cause birth defects if taken during pregnancy, so it is important to follow strict guidelines and use reliable contraception methods while taking this medication.

FAQ

How do I make a purchase?

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often

1. Please let me know which products you require and how many of each you need.
2. We will provide you with the best pricing right away, including delivery charges.
3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
5. Two days after the package is sent out, a tracking number and packing photo will be provided.
6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

How are your products verified?

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

Does a discount apply to large orders?

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.

What forms of payment do you accept?

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

Do you deliver to parcel lockers at PO boxes?

YES, we could deliver to parcel lockers at PO boxes!

Can I get a tracking number from you?

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
