

β-Nicotinamide Mononucleotide CAS 1094-61-7 premium-grade product

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Firsky
- Model Number: FS-CAS 1094-61-7
- Minimum Order Quantity: 1KG
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 2000T

Product Specification

- Shelf Life: 2 Years
- Product Name: β-Nicotinamide Mononucleotide
- CAS NO: 1094-61-7
- Purity: 99%

Product Description

Product Description

Product Name:	β -Nicotinamide Mononucleotide
Synonyms:	3-(Aminocarbonyl)-1-(5-O-phosphono- β -D-ribofuranosyl)pyridinium Inner Salt; ?3-Carbamoyl-1- β -D-ribofuranosylpyridinium Hydroxide, 5'-Phosphate Inner Salt; NMN; Nicotinamide Mononucleotide; Nicotinamide Ribonucleoside 5'-Phosphate; Nicotinamide Ribonucleotide; Nicotinamide Ribotide; β -D-NMN; β -NMN;
CAS NO:	1094-61-7
EINECS NO:	214-136-5
Molecular Formula:	$C_{11}H_{15}N_2O_8P$
Molecular Weight:	334.22
Melting Point:	>96°C (dec.)
Storage:	Hygroscopic, -20°C Freezer, Under Inert Atmosphere
Solubility:	DMSO (Slightly, Heated), Methanol (Slightly), Water (Slightly)
Stability:	Very Hygroscopic
Appearance:	White Solid powder

Description

Introducing our premium-grade product: Nicotinamide Riboside Chloride (CAS 23111-00-4). Derived from the potent compound nicotinamide riboside, this exceptional supplement offers a range of health benefits with the added advantage of being optimized for Google SEO.

Our Nicotinamide Riboside Chloride is meticulously formulated to support your cellular energy production and promote overall well-being. By increasing the levels of Nicotinamide Adenine Dinucleotide (NAD⁺) in your body, this supplement aids in vital metabolic processes.

As an SEO-friendly description, we want to highlight the key features and benefits that users searching for this product may be interested in. Incorporating relevant keywords is an essential aspect of optimizing content for search engines like Google. By including "Nicotinamide Riboside Chloride" and "CAS 23111-00-4" in the product description, we improve the chances of attracting organic traffic from individuals seeking information about these specific terms.

Investing in our Nicotinamide Riboside Chloride ensures a top-quality product that can potentially provide remarkable advantages. Boost your energy metabolism, support anti-aging effects, and promote neuroprotection with our meticulously crafted formula. Additionally, this supplement may play a role in enhancing metabolic health, assisting in glucose regulation, insulin sensitivity, and maintaining healthy lipid profiles.

While the benefits of Nicotinamide Riboside Chloride are promising, it is essential to consult a healthcare professional before incorporating any new supplement into your routine. Our product is designed with uncompromising quality and adherence to the highest industry standards, ensuring your satisfaction and peace of mind.

Discover the power of Nicotinamide Riboside Chloride (CAS 23111-00-4) and unlock a healthier, more energetic you. Trust our SEO-optimized product to deliver the desired results and help you achieve your wellness goals.

Application

β -Nicotinamide mononucleotide (β -NMN), with CAS number 1094-61-7, is a derivative of vitamin B3 and a precursor to nicotinamide adenine dinucleotide (NAD⁺). NAD⁺ is a coenzyme involved in various cellular processes and has been linked to numerous health benefits. The usage of β -Nicotinamide mononucleotide includes the following:

Cellular Energy Production: β -Nicotinamide mononucleotide is believed to enhance NAD⁺ levels in the body, which plays a crucial role in cellular energy metabolism. By increasing NAD⁺ availability, it may support mitochondrial function and promote efficient energy production.

Anti-Aging Effects: NAD⁺ levels tend to decline with age, and this decline has been associated with various age-related conditions. β -Nicotinamide mononucleotide supplementation may help counteract this decline and promote healthy aging. It has been suggested to support DNA repair, improve cellular health, and potentially slow down the aging process.

Metabolic Health: β -Nicotinamide mononucleotide has been researched for its potential benefits in metabolic health. It may help regulate glucose metabolism, improve insulin sensitivity, and support healthy lipid profiles. By influencing NAD⁺ levels, it may contribute to maintaining overall metabolic balance.

Neuroprotection: Some studies have investigated the neuroprotective effects of β -Nicotinamide mononucleotide. It may help support brain health, improve cognitive function, and potentially offer benefits in neurodegenerative conditions. However, more research is needed to fully understand its efficacy in this area.

It is important to note that research on β -Nicotinamide mononucleotide is still ongoing, and its full therapeutic potential and long-term effects are not yet fully understood. If you are considering using β -Nicotinamide mononucleotide or any other supplement, it is advisable to consult with a healthcare professional who can provide guidance based on your specific health needs and circumstances.

1. Firsky (Wuhan) continues to make efforts to steadily offer clients high-quality items. We have put in place a reliable internal quality management system and are always working to increase quality, decrease deviation, and eliminate waste.

2. If you have any questions, don't hesitate to ask them; we'll get back to you within 48 hours.

3. After getting the items, if you have any questions, don't hesitate to get in touch with us. We promise to

compensate you in full if we were the source of the loss.

FAQ

How do I make a purchase?

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often

1. Please let me know which products you require and how many of each you need.
2. We will provide you with the best pricing right away, including delivery charges.
3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
5. Two days after the package is sent out, a tracking number and packing photo will be provided.
6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

How are your products verified?

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

Does a discount apply to large orders?

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.

What forms of payment do you accept?

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

Do you deliver to parcel lockers at PO boxes?

YES, we could deliver to parcel lockers at PO boxes!

Can I get a tracking number from you?

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
