

99% purity Kojic acid CAS 501-30-4

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Firsky
- Model Number: FS-501-30-4
- Minimum Order Quantity: 1KG
- Price: CN¥355.62 - CN¥711.24
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 20000T

Product Specification

Description

Introducing our premium Kojic acid, CAS 501-30-4, a high-quality chemical compound that is revolutionizing the field of industrial chemicals. As a leading supplier of top-notch chemical raw materials, our company is dedicated to providing you with the finest ingredients for your manufacturing processes.

Kojic acid, also known as 5-hydroxy-2-hydroxymethyl-4-pyrone, is a naturally derived compound that has gained significant popularity in the chemical industry. Our meticulously produced Kojic acid, CAS 501-30-4, offers exceptional purity and quality, ensuring optimal performance in a wide range of applications within various sectors.

One of the key advantages of our Kojic acid is its remarkable ability to inhibit the production of melanin, the pigment responsible for skin darkening. As a result, it is widely used in the cosmetic industry as a skin-lightening and brightening agent. Kojic acid can be incorporated into formulations such as creams, lotions, serums, and soaps, helping to address issues such as hyperpigmentation, age spots, and uneven skin tone.

In addition to its cosmetic applications, our Kojic acid, CAS 501-30-4, finds utility in other sectors as well. It is utilized in the manufacture of certain food products, where it acts as a natural preservative and antioxidant. Kojic acid's ability to inhibit the growth of microorganisms makes it an ideal choice for enhancing the shelf life and quality of food items.

Furthermore, Kojic acid has found applications in the pharmaceutical and healthcare industries. It is being explored for its potential antimicrobial properties and its ability to inhibit the growth of certain bacteria and fungi. Research is ongoing to investigate its use in topical creams, ointments, and wound healing formulations.

Our Kojic acid, CAS 501-30-4, is meticulously manufactured under stringent quality control measures to meet the highest industry standards. It is free from impurities and contaminants, ensuring its safety and reliability for use in your manufacturing processes. With our Kojic acid, you can have confidence in incorporating a premium ingredient into your products.

Incorporating our Kojic acid into your chemical products will undoubtedly set them apart from the competition. Its exceptional skin-lightening properties, antioxidant benefits, and antimicrobial potential make it a must-have ingredient for any forward-thinking company in the chemical industry.

Choose our Kojic acid and elevate your manufacturing processes to new heights. Experience the transformative power of this remarkable compound and deliver exceptional results to your customers.

To order our Kojic acid or to learn more about our wide range of chemical raw materials, please contact us today. We look forward to assisting you in achieving your product goals.

Application

Kojic acid, CAS 501-30-4, has various applications in different industries. Here are some common uses of Kojic acid:

1. **Cosmetics and Skincare:** Kojic acid is widely used in the cosmetic and skincare industry for its skin-lightening and brightening properties. It inhibits the production of melanin, the pigment responsible for skin darkening, and helps to reduce the appearance of hyperpigmentation, age spots, and uneven skin tone. Kojic acid is incorporated into formulations such as creams, lotions, serums, soaps, and masks.
2. **Food and Beverages:** Kojic acid is utilized in the food industry as a natural preservative and antioxidant. It helps to prevent the growth of microorganisms and extend the shelf life of certain food products. Kojic acid is often added to items such as meats, fruits, and beverages to maintain their quality and freshness.
3. **Pharmaceuticals:** Kojic acid is being explored for its potential applications in the pharmaceutical industry. It has shown antimicrobial properties and is being studied for its ability to inhibit the growth of certain bacteria and fungi. Research is ongoing to evaluate its use in topical creams, ointments, and wound healing formulations.
4. **Research and Development:** Kojic acid is of interest in scientific research and development. It is studied for its various properties and potential applications in different fields. Researchers investigate its antioxidant, antimicrobial, and anti-inflammatory effects, and explore its use in areas such as dermatology, biotechnology, and tissue engineering.

It's important to note that the specific usage and concentration of Kojic acid may vary depending on the intended application and formulation. It is recommended to consult with industry professionals, adhere to regulatory guidelines, and conduct appropriate testing to ensure the safe and effective use of Kojic acid in specific products or processes.

Advantage

1. Firsky (Wuhan) continues to make efforts to steadily offer clients high-quality items. We have put in place a reliable internal quality management system and are always working to increase quality, decrease deviation, and eliminate waste.
2. If you have any questions, don't hesitate to ask them; we'll get back to you within 48 hours.
3. After getting the items, if you have any questions, don't hesitate to get in touch with us. We promise to compensate you in full if we were the source of the loss.

FAQ

How do I make a purchase?

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often

1. Please let me know which products you require and how many of each you need.
2. We will provide you with the best pricing right away, including delivery charges.
3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
5. Two days after the package is sent out, a tracking number and packing photo will be provided.
6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

How are your products verified?

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

Does a discount apply to large orders?

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.

What forms of payment do you accept?

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

Do you deliver to parcel lockers at PO boxes?

YES, we could deliver to parcel lockers at PO boxes!

Can I get a tracking number from you?

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
