

## Hot sale cosmetics grade N-Acetylneuraminic acid CAS 131-48-6

### Basic Information

- Place of Origin: China
- Brand Name: Firsky
- Model Number: FS-131-48-6
- Minimum Order Quantity: 1KG
- Price: CN¥354.86 - CN¥709.72
- Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in different specifications. Packaging can be customized according to customer requirements. Aluminium foil bag and carton.
- Delivery Time: 7-15days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 20000T

### Product Specification

## **Description**

"Discover the exceptional quality and versatility of our flagship product, N-Acetylneuraminic Acid (CAS 131-48-6), a premium chemical compound at the forefront of the industry. Renowned for its purity, efficacy, and wide range of applications, our N-Acetylneuraminic Acid is the ideal choice for your chemical needs.

Our N-Acetylneuraminic Acid, with the CAS number 131-48-6, is meticulously synthesized using cutting-edge technology and adheres to the highest quality standards. Sourced from trusted suppliers, it guarantees consistent performance, ensuring optimal results in your applications.

As a leading chemical raw material, N-Acetylneuraminic Acid finds extensive use in various industries. It serves as a vital building block for the synthesis of pharmaceuticals, nutraceuticals, and biochemical research compounds. Its unique properties and diverse applications make it an indispensable ingredient for researchers, manufacturers, and innovators.

When you choose our N-Acetylneuraminic Acid, you benefit from its exceptional purity, stability, and bioavailability. Its remarkable properties enable enhanced product performance, improved formulation stability, and increased efficiency in your applications. With our product, you can elevate the quality and competitiveness of your end products, setting new industry standards.

At our company, customer satisfaction is our top priority. We are committed to providing exceptional products and unmatched customer service. With our deep industry knowledge and expertise, we ensure a seamless purchasing experience and prompt delivery of your N-Acetylneuraminic Acid requirements.

Experience the difference of our top-of-the-line N-Acetylneuraminic Acid, CAS 131-48-6. Contact us today to discuss your specific needs and discover how our product can propel your formulations to new heights of success."

Remember to customize the description to fit your company's unique offerings and brand identity.

## **Application**

N-Acetylneuraminic Acid (CAS 131-48-6), also known as sialic acid, is a versatile chemical compound with numerous applications across various industries. Here are some common uses of N-Acetylneuraminic Acid:

1. **Pharmaceuticals:** N-Acetylneuraminic Acid is widely used in the pharmaceutical industry. It serves as a key component in the synthesis of neuraminidase inhibitors, which are important antiviral drugs used in the treatment and prevention of influenza. Additionally, it plays a crucial role in the development of glycoprotein-based therapeutics and drug delivery systems.
2. **Nutraceuticals:** N-Acetylneuraminic Acid is utilized in the production of dietary supplements and functional food products. It is valued for its potential health benefits, including immune system support and cognitive function enhancement. It can be found in various nutritional supplements and fortified food products.
3. **Biotechnology:** N-Acetylneuraminic Acid is used in biotechnological applications, particularly in the field of glycobiology. It serves as a building block for the synthesis of complex carbohydrates and glycoconjugates, which are essential for studying and understanding cellular processes, protein interactions, and disease mechanisms.
4. **Research and Development:** N-Acetylneuraminic Acid is a valuable tool in scientific research. It is used in studies focusing on cell surface interactions, cell signaling, and glycosylation processes. Researchers utilize N-Acetylneuraminic Acid to investigate its role in various biological pathways and as a marker for disease diagnosis.
5. **Veterinary and Animal Health:** N-Acetylneuraminic Acid is also utilized in the veterinary and animal health industry. It is an important component in the production of vaccines for animals, as it helps improve the immunogenicity and efficacy of certain vaccines.

It's important to note that the specific usage and application of N-Acetylneuraminic Acid may vary depending on factors such as industry regulations, research objectives, and formulation requirements. It is recommended to consult with experts and refer to relevant guidelines and safety data sheets when incorporating N-Acetylneuraminic Acid into your products or research.

## **Advantage**

1. Firsky (Wuhan) continues to make efforts to steadily offer clients high-quality items. We have put in place a reliable internal quality management system and are always working to increase quality, decrease deviation, and eliminate waste.
2. If you have any questions, don't hesitate to ask them; we'll get back to you within 48 hours.
3. After getting the items, if you have any questions, don't hesitate to get in touch with us. We promise to compensate you in full if we were the source of the loss.

## FAQ

### How do I make a purchase?

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often

1. Please let me know which products you require and how many of each you need.
2. We will provide you with the best pricing right away, including delivery charges.
3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
5. Two days after the package is sent out, a tracking number and packing photo will be provided.
6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

### Which delivery alternatives are available?

***All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.***

### How are your products verified?

***We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.***

### Does a discount apply to large orders?

***After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.***

### What forms of payment do you accept?

***We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.***

### Do you deliver to parcel lockers at PO boxes?

***YES, we could deliver to parcel lockers at PO boxes!***

### Can I get a tracking number from you?

***We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.***
