Our Product Introduction

# Tranexamic Acid cas 1197-18-8 widely recognized for its effectiveness in addressing hyperpigmentation and melasma

## **Basic Information**

. Place of Origin: China • Brand Name: Firsky

FS-CAS 1197-18-8 Model Number:

Minimum Order Quantity: 1KG

Packaging Details: 1kg, 5kg, 15kg, 20kg, 25kg can be packed in

different specifications. Packaging can be customized according to customer

requirements. Aluminium foil bag and carton.

• Delivery Time: 7-15 days

Payment Terms: T/T, Western Union, MoneyGram

• Supply Ability: 2000T

# **Product Specification**

Shelf Life: 2 Years

• Product Name: Tranexamic Acid · CAS NO: 1197-18-8 • Purity: 99%

Freely soluble in water and in glacial acetic acid, practically insoluble in acetone and in ethanol (96 per cent).
Crystalline Powder

# Description

Introducing our exceptional Tranexamic Acid (CAS 1197-18-8), a powerful ingredient that revolutionizes skincare with its remarkable properties. With its diverse range of applications, Tranexamic Acid is a sought-after solution for various skincare concerns.

Tranexamic Acid is widely recognized for its effectiveness in addressing hyperpigmentation and melasma. By inhibiting the production of melanin, the pigment responsible for dark spots and uneven skin tone, Tranexamic Acid helps fade hyperpigmentation, resulting in a more even and luminous complexion.

Experience the transformative effects of Tranexamic Acid on post-inflammatory hyperpigmentation (PIH). Whether caused by acne, injuries, or inflammation, Tranexamic Acid helps regulate melanin production, reducing the intensity of pigmentation and improving the appearance of dark spots and discoloration. In addition to its skin brightening properties, Tranexamic Acid also exhibits anti-inflammatory effects. It can help reduce redness, inflammation, and swelling associated with acne breakouts and other skin irritations, promoting a calmer and healthier complexion.

Our Tranexamic Acid product is carefully formulated to deliver maximum efficacy and results. We prioritize quality and purity, ensuring that our Tranexamic Acid adheres to the highest industry standards. Please note that specific usage recommendations, concentrations, and regulatory guidelines may vary depending on your industry and application. For precise guidance tailored to your specific requirements, we

recommend consulting industry experts and referring to relevant scientific literature.

Unlock the potential of Tranexamic Acid (CAS 1197-18-8) and discover a brighter, more even-toned complexion.

Experience the transformative power of this remarkable ingredient and enjoy the confidence that comes with healthy, radiant skin.

# **Application**

Tranexamic Acid (CAS 1197-18-8) is a versatile ingredient widely used in the healthcare and skincare industries. Here are some common usages of Tranexamic Acid:

Hemostatic Agent: Tranexamic Acid is commonly used as a hemostatic agent to control or prevent excessive bleeding. It works by inhibiting the breakdown of blood clots and reducing the activity of plasmin, an enzyme involved in the clotting process. Tranexamic Acid is often used in surgical procedures, dental extractions, and to manage bleeding disorders.

Skincare: Tranexamic Acid has gained popularity in the skincare industry for its ability to address hyperpigmentation and melasma. It helps to inhibit the production of melanin, the pigment responsible for dark spots and uneven skin tone. By reducing melanin synthesis, Tranexamic Acid can help fade dark spots, even out the complexion, and improve the appearance of skin discoloration.

Anti-Inflammatory Properties: Tranexamic Acid has been found to possess anti-inflammatory properties, which makes it beneficial in skincare formulations targeting acne and inflammatory skin conditions. It can help reduce redness, inflammation, and swelling associated with acne breakouts and other skin irritations.

Post-Inflammatory Hyperpigmentation (PIH): Tranexamic Acid is known to be effective in managing post-inflammatory hyperpigmentation, which often occurs after skin trauma or inflammation. By regulating melanin production and reducing the intensity of pigmentation, it can help fade the dark spots and discoloration left behind by acne, injuries, or other skin conditions.

Brightening and Lightening: Tranexamic Acid is also used in skincare products aimed at brightening and lightening the skin. It helps to even out the complexion, reduce the appearance of sunspots and age spots, and promote a more radiant and youthful skin tone.

When using Tranexamic Acid in skincare formulations, it is important to follow recommended usage guidelines and consult with industry experts and relevant scientific literature for precise recommendations based on your specific formulation and desired results. Additionally, it is essential to use sun protection measures, such as

sunscreen, when incorporating Tranexamic Acid into skincare routines to maximize its benefits and protect the skin from further damage.

# Advantage

- 1. Firsky (Wuhan) continues to make efforts to steadily offer clients high-quality items. We have put in place a reliable internal quality management system and are always working to increase quality, decrease deviation, and eliminate waste.
- 2. If you have any questions, don't hesitate to ask them; we'll get back to you within 48 hours.
- 3. After getting the items, if you have any questions, don't hesitate to get in touch with us. We promise to compensate you in full if we were the source of the loss.

# FAQ

### How do I make a purchase?

We advise that you speak with our customer support personnel before placing an order because the market price of chemical raw materials fluctuates often

- 1. Please let me know which products you require and how many of each you need.
- 2. We will provide you with the best pricing right away, including delivery charges.
- 3. If the price seems reasonable to you, you can select a payment option to complete the transaction.
- 4. After we confirm your payment, your shipment will be wrapped and dispatched within 24 hours.
- 5. Two days after the package is sent out, a tracking number and packing photo will be provided.
- 6. We wish you a wonderful shopping experience and encourage you to get in touch with us if there are any problems.

#### Which delivery alternatives are available?

All Fushikai orders are shipped from Japan using FEDEX, UPS, DHL, Airmail, Surface Mail, EMS (Japan Post), and Economical Air (SAL). Depending on the various nations, we will select the best choice. Once payment has been received, the approximate delivery time is 5-7 working days.

### How are your products verified?

We use our own quality control team to inspect each batch of products. Only at least 98% of pharmaceutical raw materials are used in the synthesis process, rather than cheap sources that are replicated using discarded chemical ingredients. Multiple tests are conducted using cutting-edge equipment to ensure perfect accuracy in determining the potency, purity and quality of ingredients and finished products.

#### Does a discount apply to large orders?

After your order reaches a particular value, there is a large discount. Several seasonal sales and promotions are available from us.

## What forms of payment do you accept?

We accept payments with Western Union, Bitcoin, e-transfers, bank transfers, MoneyGram, and Alipay in addition to all other forms of cryptocurrency.

### Do you deliver to parcel lockers at PO boxes?

YES, we could deliver to parcel lockers at PO boxes!

## Can I get a tracking number from you?

We will provide you the tracking number and some images of the items you ordered as soon as the shipment is planned. For the most up-to-date tracking updates, please go to our preferred site.
